Year in Review Key numbers

Global value added Seafood producer and sales and marketing company

Year in ReviewHighlights

Year of integration, consolidation and investments

Nasdaq main market listing and capital raising

- Completed in October 2019
- 225 million new shares issued, €15.2m increased equity
- 112 new shareholders, 452 shareholders at year end
- Good balance between industrial and financial investors in shareholder group

Synergies in South Europe

- Merger Project in Spain on track
- Legal merger took place on January 1st 2020 with headquarters merged in Barcelona.
- Production of light salted cod moved to one location
- Restructuring of Ecomsa from production hub to distribution center in Andalucia

New acquisition

- SPA signed in November 2019, acquisition completed on February 21st 2020
- Production facility in Barcelona, focusing on light salted products
- Opportunities to further leverage distribution and production capacities in S-Europe
- Strengthens Iceland Seafood's sourcing network
 with GPG and Icemar joining the shareholders Group

Key investments 2019

- Facility extension and new salmon filleting line up and running in Oceanpath
- New chilled processing line up and running at Iceland
 Seafood Barraclough in December 2019
- Increased production and coldstore at Achernar our Argentinian factory
- All cod production in one place and one office at Iceland Seafood Ibérica in Barcelona

Year in ReviewChairman's Address

Magnús Bjarnason

Chairman

Iceland Seafood's performance for 2019 was in line with expectations and up 56% on the previous year. Pre-tax profit excluding one-off items in 2019 was €11.3 million, as compared to €7.2 million in 2018. The company's equity ratio was boosted by a €15 million increase in share capital, coupled with a very successful stock market flotation in the autumn. At the same time, the financial situation of its subsidiaries has been bolstered by changes which simplify organisation, streamline operations and lay the foundations for continued growth. Despite the scale of Iceland Seafood's activities, we have little HQ overhead. Some of our major customers -Aldi, Tesco, Musgraves – and Icelandic producers

call for cost-awareness. Frugality is perhaps the word which best describes Iceland Seafood's corporate spirit.

The new Board of Directors – made up of Jakob Valgeir Flosason, Liv Bergþórsdóttir, Ingunn Agness Kro and myself – began work in January 2019. Co-operation between the board and the managers has been good, and we consider this to have been a successful year. The merger of our partners in Spain, investment in Argentina and continued development of cooperation with fishing companies in Iceland have been major projects this past year and these are all beginning to bear fruit. Late last year, we announced our purchase of ELBA in Spain. We were very happy to conclude this deal, which strengthens our marketing in Spain and our

Year in ReviewChairman's Address

relations with major producers in Iceland. We are now moving into the United Kingdom, with the purchase of fish processing premises in Grimsby and the merger of Havelok and Barraclough into one strong British company able to sell both frozen and fresh products via all distribution channels to retailers, restaurants and organisations. In my opinion we had the choice of reducing or increasing our operations in the United Kingdom. We decided to invest, streamline and take advantage of post-Brexit opportunities for growth.

Iceland Seafood has deep roots in the Icelandic fishing industry. And is made up of all major

sales organizations that have existed in Iceland with the addition of strong local companies in our core markets. We have great respect for the past and should learn from what was done well to benefit from for the future. Iceland Seafood is a leader in three fields. We shall continue to invest in these operations in the coming years to safeguard our future competitiveness.

1. First, Iceland Seafood Iberica in Spain — markets and sells products under the 'Icelandic' and 'Islandia' brand names to restaurants and hotels in Southern Europe. Frozen lightly salted cod is the most important product, together with salted fish and other products coming from all over the world. This is the single biggest market for frozen Icelandic cod. Demand for 'Islandia'

and 'Icelandic' products is high – some 20% of the cod quota from Iceland goes through this distribution channel, which yields higher prices than comparable products from Norway and Russia. Our extensive operations in Southern Europe give producers access to a large market which is also the backbone of Iceland Seafood's operations.

2. The second pillar revolves around our operations in Northern Europe, consisting
of the United Kingdom and Ireland. We see
opportunities for growth in these markets.
In order to move closer to our customers,
we have been looking at companies and
investment opportunities that sell to retailers.
In 2018, Iceland Seafood acquired 67% stake
in Oceanpath, which has around 20% market

Year in ReviewChairman's Address

share in the Irish retail market. The company buys cod, haddock and other types of fish from Iceland. Earlier this month, we announced the purchase of 10,000m2 processing plant in Grimsby, which will be Iceland Seafood's home in the United Kingdom. These investments create opportunities to streamline and bring producers closer to customers.

3. The third pillar in Iceland Seafood's operations is international sales and distribution based in Iceland. From here, we handle the sale of diverse products in a partnership with Icelandic producers.

We need to continue to strengthen these three pillars. Fisheries are a big industry in Iceland with around €2 billion annual income. In the international markets we are competing with larger companies servicing customers with ever-greater demands. Icelandic producers can join forces to secure the best possible results for the 1 million tonnes of fish caught in Icelandic waters. This is only a bit more than 1% of the fish caught in the world.

Iceland Seafood has an important part to play in uniting these forces of producers in international markets. The company needs to strive for further streamlining and a better understanding of the needs of consumers in different markets. Continued partnership with producers is essential for

future success and long-term profitability for the company's shareholders.

I have enjoyed servicing as Chairman of the Board of Iceland Seafood. I have, however, decided not to stand for continued membership of the Board. I feel it would be difficult to reconcile my work as an international M&A advisor in the seafood sector with chairmanship of a listed company in the same sector. I would like to thank the shareholders for their trust and for the opportunity to contribute to the development of Iceland Seafood. I thank my colleagues on the Board, the CEO and the Financial Director for excellent co-operation and wish them all the best in the future.

Magnús Bjarnason
Chairman

Year in Review CEO's Statement

Bjarni Ármannsson

CEO

We are proud to be Iceland Seafood.

I'm happy to report that 2019 was in general a good year for Iceland Seafood. Operationally and financially we did well and delivered results in line with budget – which was communicated in March 2019.

Strategically we also took some very important steps during 2019.

Clearly the listing of the shares of Iceland Seafood on Nasdaq main market and concurrent capital raising was extremely important. From year end 2017 until 2019 our

"Strategically we also made some very important steps during 2019"

book equity has gone from €17.7 to €80.2 and equity ratio from 20.1% to 38.3%. The financial strength of the group is greater and we are therefor also making bigger moves and strengthening further the foundation for our existence and purpose.

Listing on the NASDAQ stock exchange also means that we are transparent about our status and activities, we aim to be a good corporate citizen in the sense that our direction is clear and we are sending a clear message to our shareholders, customers, employees

Year in ReviewCEO's Statement

and the communities: that we are effecting our strategy and our goals and that we are doing what we say we do.

The move from First North to Main market listing also means a better access to risk capital and the ability to use our shares as a payment means in transactions. That is important to us. We have used increase of share capital to fund growth on two separate occasions during the first months of 2020. This is a very important tool for us.

Towards the end of the year we made an acquisition in Spain where we acquired Elba,

"Listing on the NASDAQ stock exchange also means that we are transparent about our status and activities"

a long-standing provider of light salted cod, to further enhance our position in Southern Europe.

The new legal entity in Spain, Iceland Seafood Iberica started operation on January 1st 2020. We are very excited about consolidating our position in Barcelona as our production hub. The management team is dedicated to delivering value to our customers and the operational synergies with the merger of the two companies. Our position in light salted cod is strong and we believe we can further build our position in the market.

Growth in the UK

We have recently announced efforts to consolidate our position in the market and to merge our two UK entities. This will happen during 2020. We are investing in the UK market to better serve both the retail and the food service market. It is a very competitive market, but also a market that is very relevant to us and to Iceland. We see good opportunities in the UK and this is an effort to increase activities in Northern Europe.

Strong cooperation with Icelandic producers

It is very important for our customers to trust Iceland Seafood and we are very grateful for that trust and realize that it also means that we must deliver quality

Year in ReviewCEO's Statement

"We believe we have a bright future. We believe in the future. We believe we can make value for all our stakeholders"

products all the time. A key issue for us is to have a strong collaboration with our suppliers and customers, based on long-term commitment, trust and loyalty. We are extremely appreciative of the trust we have been shown and treasure it deeply. We also believe that making Iceland Seafood a stronger sales channel out of Iceland is in the interest of our suppliers and customers. We create a stronger supply pipeline, attract

a stronger customer base and are in a better position to create value for all parties.

We believe we have a bright future. We believe in the future. We believe we can make value for all our stakeholders. That's a big part of what keeps us ticking.

We are also convinced that environmental, social and governance matters are more and more important to our stakeholders. Iceland Seafood addresses those matters with respect and a vision of doing our bit to be responsible, forward thinking and innovative. A lot of issues dealing with packaging, sourcing, sustainability, labor care issues, equality etc. matter to us and we are addressing those issues. Sometimes they are

counterintuitive and all of them require us as companies and individuals to think and act in a responsible and progressive manner.

Therefore we are proud to be Iceland Seafood.

We are Iceland Seafood

Iceland Seafood is a worldwide sales, processing and marketing group for a variety of frozen, fresh, salted and dried seafood and value added seafood products.

Our history and heritage dates back to 1932 from three associations: the Union of Icelandic Fish Producers (SIF), founded in 1932; the Herring Board, founded in 1935; and the Seafood Division of Samband of Iceland, founded in 1957. Our strong roots in the Icelandic seafood sector form the basis of our

expertise and long lasting relationships built on trust and reliability. Today, Iceland Seafood is a respected industry leading supplier of North Atlantic fish and seafood and a leading service provider in our markets. We are one of the largest exporters of fish products from Iceland and a key processor of highquality seafood in the Spanish, Irish and UK markets. We serve all major seafood markets worldwide, where we have depth of expertise and understanding to meet our customers needs, combined with innovative flexible solutions and strategic global distribution. Our headquarters are in Iceland, and we operate 3 divisions with 12 businesses in Europe and North and South America.

We are Iceland Seafood

Sales and Distribution Division

Iceland Seafood Iceland, located in Reykjavík, is one of the largest companies in the export of seafood from Iceland to all main markets around the world. The company operates in close cooperation with Icelandic seafood producers and provides sourcing expertise, quality control and logistic solutions for other Iceland Seafood companies. www.icelandseafood.is

Iceland Seafood France, based in Boulognesur-mer, provides high-quality seafood from

Iceland and from a variety of global sources. The company supplies fresh and frozen products to food service, retail and processors in France.

www.icelandseafood.fr

Iceland Seafood Germany, located in Hamburg, is a supplier of high-quality fresh seafood. Fresh fish is mainly flown in from Iceland for delicatessen stores, food service and retail.

www.icelandseafood.de

Iceland Seafood U.S.A., our USA division, markets a full range of cod, haddock and pollock/saithe products for the distributor, food service and restaurant industry in the USA.

Products are imported directly from Iceland, Russia and Asia. www.icelandseafood.net

We are Iceland Seafood

Value Added Divisions

Iceland Seafood continues to invest in value added activities in line with global trends. We are focused on supplying great quality seafood and creating solutions for our customers.

Northern Europe Division

Havelok Limited, located in Grimsby

(UK), supplies high-quality seafood from

procurement to packed product, which is
second to none, offering one of the finest
ranges of breaded, battered and plain fish in

the UK. It is focused primarily on the catering and foodservice market. **www.havelokltd.co.uk**

Iceland Seafood Barraclough, located in Bradford (UK), specialises in supplying our retail customers with private label high-quality fish and shellfish globally sourced. It specialises in smoking, cutting to customer specs and packing for many of the largest retailers in the UK.

Oceanpath Limited, operating out of two factories in North Dublin, is one of the largest seafood processors in Ireland, supplying to major Irish retailers and food service customers. Within the Group, Dunn's of Dublin is an iconic premium retail brand best known for its smoked seafood products.

www.oceanpath.ie

Southern Europe Division

Iceland Seafood Ibérica is the new kid on the block and comes from the fusion of Icelandic Íberica and Iceland Seafood Spain. The company serves the southern European market including Spain, Italy Portugal and Greece. The company has offices in Barcelona, Vigo, Bilbao, Málaga and Italy. The company also runs Ecomsa, a distribution entity in the South of Spain, and Achernar, a factory in Argentina processing shrimp for all markets. The company offers a variety of frozen and salted product from all major fishing grounds in the world and runs factories both in Barcelona and in Argentina.

Financial Performance Income Statement

The 2019 Financial Statement are the first consolidated audited accounts reflecting full year impact of the acquisitions made in 2018, i.e. Oceanpath and Solo Seafood. Sales of €448.2m were 29.5% higher than in 2018 and 4.0% up on 2018 Proforma figures. Increase in sales of products from Iceland, related to closer cooperation with key producers, was the main driver for increased sales. Normalised PBT for the year of €11.3m was close to the mid-point of the market outlook range, first published in March 2019 and €0.5m higher than 2018 Proforma.

		2019			2018	
Consolidated Income Statement	Normalised result	Significant items	IFRS	Normalised result	Significant items	IFRS

Balance Sheet & Cash Flow

At end of the year total assets amounted to €209.5m, compared to €193.8m at end of 2018. The increase in assets is mainly explained by: investments in fixed assets mainly in Ireland, UK and Argentina, impact of IFRS 16 lease accounting, higher cash headroom in Spain. The equity ratio at year end was 38.3% compared to 30.6% at end of 2018. Net debt of €65.5m at year end 2019 were €13m lower than in year beginning, helped by the equity increase in October 2019.

Consolidated Balance Sheet	31 December 2019	31 December 2018
Assets	209.455	193.794
Non-current assets	68.080	61.802

Financial PerformanceGroup Financials

Risk Management

Iceland Seafood International activities are exposed to variety of risk factors related to its operations and financials. Effective risk management is important to minimize the risk of material misstatements and for the business to perform. Detailed information on risk factors can be found in the Prospectus which was published in relation to the Nasdaq Main Market listing in October 2019 and is available on the Company's website.

The outbreak of COVID19 in Q1 2020 and actions taken in Europe and United States to

control the outbreak will have impact sales and profitability of the Company in the 1H 2020. The financial implications are uncertain at the time the Annual Report is issued and will depend on the development and timeframe of restrictions that have been set

The following description of risk factors is not complete and is not listed in any order of priority.

Currency risk: The reporting currency of the Group is the Euro, therefore the Group has a currency risk related to the operation of subsidiaries in UK and USA, which operate and report in a different currency. Additionally, The UK entities represent ca. 15% of the Group's operating divisions profits in 2019, whilst the Argentinean and USA operations were immaterial. Additionally, individual subsidiaries use forward contracts to mitigate currency risk, e.g. when buying raw material in a foreign currency to the local market. In certain markets, predominantly Iceland, purchases are made in the currency that the goods are sold, providing a natural currency hedge.

Supplier risk: The Group is exposed to risks regarding suppliers, in both the wild and farmed seafood sector, as it sources its products from specific origins and production methods. This potentially limits the number of suppliers the Group can

Financial PerformanceGroup Financials

Risk Management

purchase from in some instances, although the Group has a wide supply base. Currently four large Icelandic seafood companies, which hold a considerable percentage of the national fishing quotas in Iceland are significant strategic shareholders in Iceland Seafood which the company believes mitigates the risk considerably. In Argentina the Company is cooperating with raw material broker and vessel owners that hold licences for fishing Argentinean shrimp. To secure the raw material needed for the production, agreements have

been made where these counterparties are obliged to sell the raw material they catch to the Company's operation for a defined period of time. As consideration for this commitment, the Company provides pre-payment to the counterparties for the raw material.

Credit risk: The credit risk of the Group mainly relates to accounts receivables, i.e. those customers are not able to pay for goods that the Group has sold to them. The Group controls this risk carefully, with the vast majority of all receivables credit insured. The Group does not take uninsured positions against a customer without going through an appropriate risk assessment procedure.

Liquidity risk: The Group controls liquidity risk by maintaining access to appropriate loan facilities, taking into account sufficient headroom for fluctuations, whilst cash flow is monitored on a daily basis. The Group's main sources of financing are; a multi currency revolving credit facility with Icelandic financial institution with a cap of EUR 50 million, short and medium term credit facilities with number of Spanish banks. The Icelandic loan facility is secured with pledge over the Group's inventories and receivables except from Spain. Loan facilities in Spain are not secured with direct pledge but most agreements include a negative pledge clauses. Headroom of the loan facilities was around EUR 29 million at year end 2019, which is in the opinion of management sufficient to cover fluctuation

Financial PerformanceGroup Financials

Risk Management

both with regards to total facility amount and underlying assets.

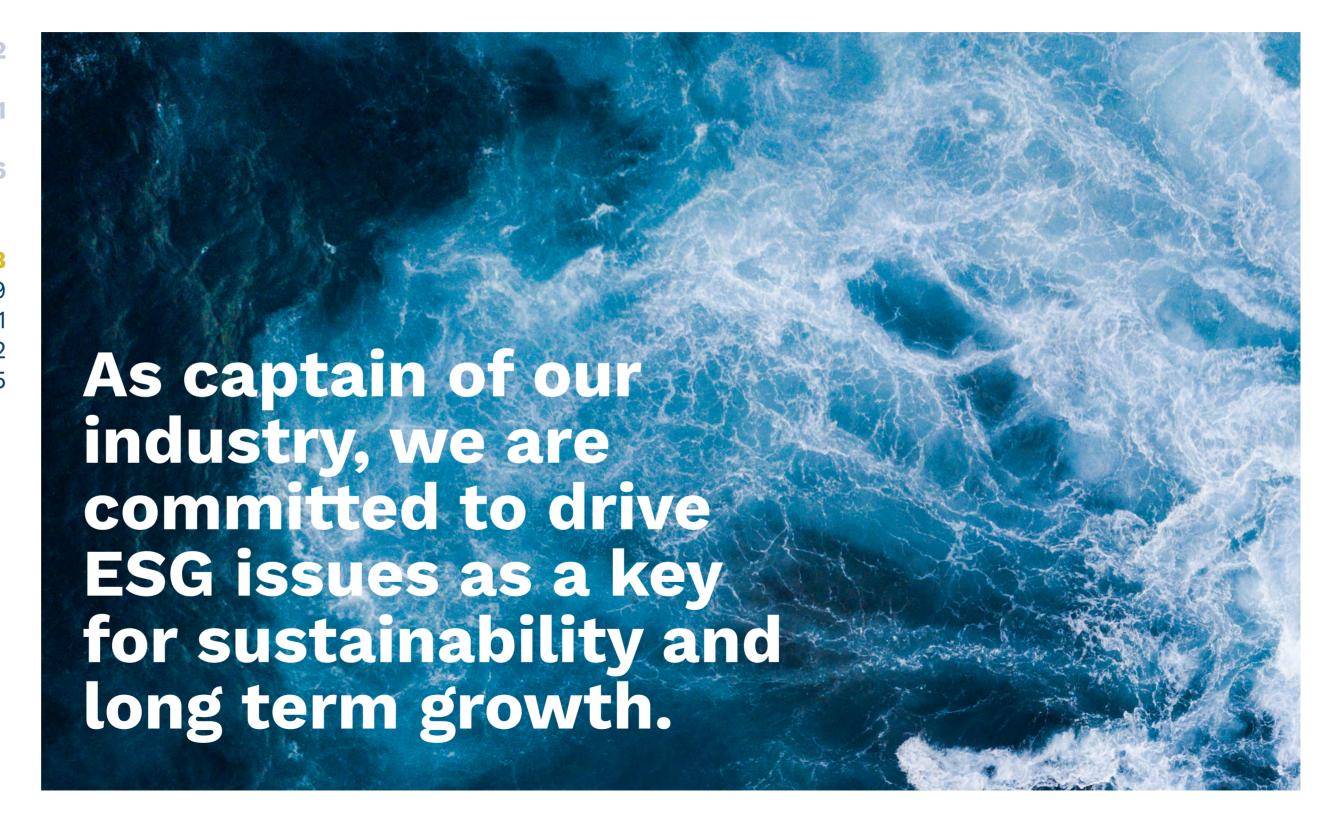

Insurance Risk: The Group has appropriate insurance policies in place, which provides insurance cover against product and property damage, certain delays, general liability and environmental liability in accordance with normal practice within the industry.

Additionally, the Company maintains Directors and Officers insurance for its executive management.

Corporate Governance & Social ResponsibilityCorporate Governance

Iceland Seafood International is a limited liability company operating under Act No. 2/1995 respecting Public Limited Companies. Under its Articles of Association, the Company is governed by shareholders' meetings, the Board of Directors and the Chief Executive Officer.

The Company's Articles of Associations and rules of issuers of securities listed at Nasdaq First North make up the framework for the Corporate Governance practices for Iceland Seafood International. Reference is

also made to the Icelandic Guidelines on Corporate Governance which are published by the Iceland Chamber of Commerce, SA Business Iceland and Nasdaq Iceland.

Board of Directors

At the Annual General Meeting of the Company, three members and one alternate member are elected to the Board of Directors.

The Board of Directors holds the supreme authority between shareholders meetings and promotes the development and long-term performance of the Group and the supervision of its operations. Together with

the CEO, they formulate the strategy policies, and set goals and risk parameters for the organisation.

The Board is responsible for the recruitment and dismissal of the CEO. The Rules of Procedure for the Board of Directors were adopted in line with Article 70 of the Public Limited Company Act, also defining the sub-committees appointed to operate on its behalf. These Rules of Procedure are supplementary to the Articles of Association.

Board Committees

The Audit Committee ensures the quality of the financial statements and internal

Corporate Governance & Social ResponsibilityCorporate Governance

controls. It has oversight of the external auditors. It also presents proposals for the selection of external auditors and ensures their independence. Members of the Audit Committee are Magnús Bjarnason, Ingunn Agnes Kro and Lee Camfield.

The Remuneration Committee is responsible for establishing a remuneration policy for the Company. Members of the Remuneration Committee are Liv Bergbórsdóttir and Magnús Bjarnason.

Chief Executive Officer

The CEO carries out the day-to-day operations of the Company and must, in this respect, follow the policies and instructions laid down by the Board and abide by laws and regulations. The CEO must at all times conduct his work with integrity and take account of the Company's interests.

Corporate Governance & Social ResponsibilityESG measurements

Iceland Seafood first issued a corporate social responsibility report in 2018. This is the second year the company reports on the topic. The scope of the report for 2019 is broader than before as it covers increased operations and improved reporting on metrics. The report is based on the second version of voluntary non-financial guidelines for Environmental, Social, and Corporate Governance (ESG) disclosure issued by Nasdag's Nordic and Baltic stock exchanges. The Nasdaq voluntary guide focuses on the ESG metrics that the World Economic Forum has recommended to stock exchanges around the world. The following are the key metrics, but for more detail see ISI ESG-report.

Environmental Responsability

The key environmental aspects of Iceland Seafood are sustainable fisheries, energy use, greenhouse gas emissions, water use, and waste. The seven value-added factories represent the great majority of ISI's environmental footprint.

Corporate Governance & Social Responsibility Environmental Responsibility

nvironmental Metrics	2019		
Full Time Equivalents (FTE)	659	E4 Energy Intensity	
Annual Revenue (EUR m)	448	Energy consumed/FTE (MWh/FTE)
